FinTech Product Manager (with Coding Abilities)

Description

We are at the intersection of both world-class technology and finance. Our business is providing a cloud based SaaS platform to the most sophisticated hedge funds and asset management firms. We are a stable organization privately financed by two of the most famous investment firms of all time. Seeking a Product Manager with FinTech experience and a Computer Science background.

Responsibilities

The ideal candidate will have a minimum of 5 years of product management or relevant experience and a Bachelor's in Computer Science or a related engineering field. This person will have experience building financial technology products with experience with financial master data management, treasury/portfolio finance, and fund accounting products a plus.

Demonstrated expertise with the product lifecycle including requirements analysis, planning, design, delivery, and user feedback is a must.

Hiring organization

Quantitative Systems
